Starting a new school?

- Buy uniform
- Get school shoes
- Check primary school
jabs are up to date

Primary school jabs are:

- Diphtheria, tetanus, pertussis and polio
- Measles, mumps and rubella

Your child will be learning and socialising with more children when they start their new school and could be at risk of catching preventable diseases if they haven't had all their childhood jabs.

Protect yourself, protect others

If you are not sure if your child has had all their routine vaccinations, check their personal health record (Red Book) or contact the GP surgery.

To get the best protection for your child, they need to have had two doses of MMR vaccine. For a checklist of the vaccines and the ages at which they should ideally be given visit www.nhs.uk/vaccinations
